Explanatory Notes

1 General information

“Intercapital Property Development” ADSIC is a company registered in accordance with the Special Purpose Vehicles Act. The Company operates as a collective investment scheme for real estate; “real estate securitization” means that the Company purchases real estate with cash flows accumulated from investors by issuing securities (shares, bonds).

The Company is registered as a stock company and is entered in the Commercial Registry in the Sofia City Court, company case № 3624/2005, batch № 92329, volume 1204, reg. 1, page 23. The Bulstat Code is 131397743. The legal seat and the address of the Company’s management is Aksakov Str. № 7a, Sofia.

The Company’s shares are listed for trading on the Bulgarian Stock Exchange – Sofia AD and on the alternative trading system NewConnect, organized by the Warsaw Stock Exchange.

The Company has a one-tier management system. The Board of directors is composed as follows:

- Velichko Klingov,
- Tsvetelina Hristova.
- AHELOY 2012 EOOD, represented by the Manager Nicolay Stefanov Chergilanov

The Investor Relations Director is Milen Bozhilov.

Service companies of “Intercapital Property Development” ADSIC in compliance with the clauses of the Special Purpose Vehicles Act are: Optima Audit AD, Marina Cape Management EOOD, IP Intercapital Markets AD, and AD Tokushev and Partners. Independent appraiser of the properties is Dobi 02 EOOD.

2 Basis for the preparation of financial statements

The Company maintains its current accounting in accordance with the requirements of the Bulgarian trade and accounting legislation.

The Company’s financial statements are prepared in compliance with the International Financial Reporting Standards adopted by the European Commission. They include the International Accounting Standards (IAS), the International Financial Reporting Standards (IFRS) and the interpretations for their application (SIC - IFRS interpretations). IFRS also include the subsequent amendments and complements to these standards and interpretations and the future standards prepared by the International Accounting Standards Board (IASB).

2.1 Going concern

The financial report is compiled in compliance with the going concern principle. As of the date of the compliance of the present financial report the management of the Company has made an assessment of its ability to continue as a going concern based on the information available for the foreseeable future. Despite the fact that the Company has accumulated losses from its activity in the last two reporting years and that the sum of the current liabilities exceeds the sum of the current assets with BGN 39 853 thousand as of 31.12.2015 and with BGN 40 688 thousand as of 31.12.2014, after examination of the Company's activity the management expects that the Company shall have sufficient financial resources to continue its operational activity in the near future and shall continue to apply the going concern principle when preparing its financial statements. Furthermore, management has prepared a plan for financial stabilization of the company. In accordance with it / the plan for financial stabilization of the company / 2015 contains measures for taking effective action to cut costs, restructure its debts and increase its revenue.

3 Comparative Data

When appropriate, for the purposes of a better presentation of the financial statements, the comparative data is reclassified in order to provide comparability with the current period, while the nature, amount and reasons for the reclassification are duly reported. When it is practically impossible to reclassify the comparative data, the Company announces the reasons for that as well as the nature of the changes that would have been made, should the amounts have been reclassified.

4 Changes in accounting policy

4.1 General provisions

4.1.1 Changes to IFRS that are compulsory for the current year

The Company applies the following new standards, amendments and interpretations of IFRS, developed and published by IASB, which affect the financial report of the Company and are mandatory for application since the reporting period beginning on or after 1st January 2015.

Amendments to IAS 19 Employee benefits under defined benefit plans

The Company has applied the changes for the first time in the current year. Before the amendments the Company reported discretionary contributions of employees to defined benefit plans as a reduction of cost of service, when the contributions are paid to plans, and reported contributions of employees given in defined benefit plans as a reduction of cost of service when the service was provided.

The amendments require the Company to take into account the contributions of employees as follows:

- Discretionary contributions for employees are reported as a reduction of cost of services under payment plans
- The contributions of employees given for defined benefit plans are recorded as a reduction of cost of services only if such contributions are related to services. In particular, when the amount of these contributions depends on the number of years, the reduction in cost of services is made as contributions refer to time served in the same way as it applies to income. On the other hand, when such payments are determined based on a fixed percentage of salary (i.e. regardless of the number of years), the Company recognizes a reduction in service costs in the period in which the appropriate services are provided.

These changes have been applied retrospectively. The application of these names has no effect on the disclosures or the amounts recognized in the financial statements of the Company.

Annual Improvements to IFRSs 2010-2012 Cycle and Cycle 2011-2013

The Company has applied the amendments to IFRS included in the annual improvements to IFRSs cycle 2010-2012 and 2011-2013 cycle for the first time in the current year.

One of the annual improvements requires companies to disclose management judgments in applying the criteria for aggregation given in paragraph 12 of IFRS 8 Operating Segments. The Company has aggregated several operating segments into a single operating segment and has made the necessary disclosures in note 6 with respective amendments

Implementation of other changes had no effect on the disclosures or the amounts recognized in the financial statements of the Company.

4.1.2 The Company has not applied the following new or revised IFRS issued that become effective for periods beginning on or after January 1, 2016, which permitted early adoption.

IFRS 9 Financial Instruments

IFRS 15 Revenue from contracts with clients

Amendments to IFRS 11 Accounting for the acquisition of interests and in joint operations

Amendments to IAS 1 Initiative disclosure

Amendments to IAS 16 and IAS 38 Explanation of methods allowed for depreciation and amortization

Amendments to IAS 16 and IAS 41 Sale or payment by assets between the investor and its subsidiary or joint venture

Amendments to IFRS 10 and IAS 28 Investment companies: application of exceptions to the consolidation of the annual improvements to IFRSs 2012-2014 cycle

There are no other IFRS or IFRIC interpretations that are not yet effective, which are expected to have a significant effect on the company.

5 Accounting Policy

5.1 General Position

The most important accounting policies applied to the preparation of these financial statements are presented below.

The financial reports are prepared in compliance with the valuation principles concerning any type of assets, liabilities, revenues, and expenses according to IFRS. The valuation bases are announced in detail in the following points of this accounting policy. The financial statements are prepared in compliance with the going concern principle.

It must be pointed out that the presented financial statements are based on certain accounting estimates and assumptions. Although they are based on the information provided to the management by the date of preparation of the financial statements, the actual results may vary due to the estimates and assumptions made.

Substantial effects in the current, previous and future periods resulting from the initial implementation of above mentioned standards and interpretations regarding presentation, recognition and estimation of the amounts have occurred.

5.2 Transactions in foreign currency

The items of the financial statements of the Company are valued in the currency of the general economic environment in which the Company performs its activity (“functional currency”). The Company’s financial statements are presented in Bulgarian lev BGN. This is the functional currency and the currency for presentation of the Company.

The transactions in foreign currency are accounted when they are initially recognized in the accounting currency of the Company at the official foreign exchange rate for the transaction date, (the fixing announced by the Bulgarian National Bank). The gains and losses from foreign exchange operations, arising at the settlement of those transactions and at the revaluation of the positions in foreign currency at the end of the period, are reflected in the Income Statement.

The Currency Board in Bulgaria was introduced on 1 July 1997 in accordance with the recommendations of the International Monetary Fund (IMF) and initially the BGN was fixed to Deutsche Mark in the ratio of 1:1. When the Euro was introduced, the Bulgarian lev was fixed to the Euro in proportion 1EUR = 1.95583 BGN.

5.3 Revenues and Expenses

The revenues include revenues from sales of finished goods, investment property and management of investment property.

The revenues are valued at fair value of the received or receivable compensation, provided that all the commercial discounts and quantity rebates, made by the Company, have been taken into account. In case of an exchange of similar assets with similar price, the exchange is not counted as a revenue generating transaction. The revenues are recognized at the moment of their realization while the expenses are recorded in compliance with the principle of matching with the realized revenue.

In case of a sale of finished goods and goods for sale the revenue is recognized if the following criteria are met:

- The substantial risks and benefits from the ownership of the goods have been transferred to the buyer;
- The seller retains neither continuing participation in the management of the goods for sale or the finished goods, nor effective control over them;
- The amount of the revenue can be measured reliably;
- It is probable that the economic benefits of the transaction will flow to the Company;
- The costs (both incurred to date and expected future costs) are identified and can be measured reliably;
- When there is a completed stage of the construction (contracted with the client) as well as when the respective certificate of use is received;
- The revenue from sale of real estate property is reported when there is transfer of ownership or of right to use.

To summarize, the main principle in the accounting policy of the Company is the Matching principle of the revenues to the expenses. That is, only after the final delivery of the finished goods or the goods for sale and the completion of all the expenses related to the packing of those goods the revenues shall be recognized.

The revenue related to a service providing transaction is recognized when the result of the transaction can be measured reliably. The investment revenue from renting of investment properties is included in the Comprehensive Income Statement on the basis of the rendered services for which the service company Marina Cape Management EOOD has issued invoices.

The operating expenses are recorded in the Income Statement at the moment of using the service or on the date of their emergence. The dividends received, excluding those coming from investments in associated companies, are recognized at the moment of their distribution.

The gains and losses from foreign exchange operations are recognized currently as the transactions are performed and the related foreign exchange differences are realized.

The revenues from fees and commissions are classified as operating revenues.

The revenues from interests are recognized on a proportionate time basis by using the method of the effective interest rate.

When a receivable is questionable the Company reduces its book value to its realizable value - the expected future cash inflow discounted at the initial effective interest rate of the instrument – and continues to unfold the discount in the form of interest revenues.

According to the model of the fair value all investment properties are estimated at fair (market) value and when the financial statements are prepared the difference between the book and the fair value is accounted as a revenue or expenditure from revaluation of investment property in the Income Statement. Depreciation of investment property is not calculated.

The Company writes off its investment properties when they are sold or when they are permanently out of usage, in case that no economic benefits are expected from their sale. The profits and losses from taking out of usage or sale of the investment properties are included in the Income Statement (comprehensive income) and represent the difference between the net proceeds from the sale and the book value of the asset.

5.4 Loan expenses

The loan expenses are mainly interest paid on the loans received by the Company. All the loan expenses, including those which could be directly attributed to the purchase, the construction of an asset responding to the requirements, are recognized as expenses for the period in which they have arisen as part of the “financial expenses” in the Income Statement. In the Comprehensive Income Statement are reported additionally paid bank fees related to renegotiating loan relationships. Till the final completion of the construction works for a respective project, the loan expenses increase the direct cost of the properties in construction. After the final completion of the construction works on the project the capitalization of the loan expenses shall be ceased. The capitalization of those expenses shall be ceased also in case of temporary suspension of the construction works.

5.5 Intangible assets

The intangible assets are initially valued at their cost. In case of independent acquisition the cost is equal to the purchase amount plus all non-recoverable taxes and direct expenses made in relation of the preparation of the asset for exploitation.

The Company applies the alternative approach for further valuation of property, plant and equipment, and the recommended approach for all the other non-current tangible assets.

The increases of the value which are due to revaluation of land are accounted as an increase of the reserves. The decreases that are up to the amount of previous increases in the same asset are reported as decrease of the same reserve. Further decreases in the value of the asset are accounted as decrease of the additional reserves (if there are such ones) or as current expenditure. The revaluation reserve is recognized as undistributed profit after the decommissioning of the respective asset.

The results from decommissioning of non-current assets are determined by comparing the proceeds to the book value and are reported in the financial result for the period. If the book value of a certain non-current asset is higher than its realizable value, this asset shall be impaired to its realizable value.

Property, plant and equipment acquired under the terms of a financial lease are depreciated based on their expected useful duration determined by comparing the asset to similar assets, or based on the lease value if the latter has a shorter duration.

The depreciation of property, plant and equipment is calculated by using the straight-line method of depreciation on the estimated useful life of the different groups of assets as follows:

- Machinery 3,3 years
- Office fittings 6,67 years
- Equipment 10 years
- Computers 2 years
- Others 6,67 years

The chosen threshold of essence of the property, plant and equipment owned by the Company is 700 BGN.

5.7 Lease Reporting

In accordance with IAS 17 "Leases", the rights of ownership of the asset are transferred from the leaser to the lessee, in cases where the lessee bears the substantial risks and rewards incidental to ownership of the leased asset.

Upon conclusion of a finance lease, the asset is recognized in the statement of financial position of the lessee at the lower of the two values - the fair value of the leased asset and the present value of the minimum lease payments plus incidental payments, if any. In the statement of financial position is reflected the corresponding finance lease obligation, regardless of whether some of these lease payments are payable in advance upon signing of the lease.

Subsequently, the lease payments are apportioned between finance expense and a reduction of the outstanding obligation under finance lease.

Leasing of land and buildings are classified separately, distinguishing components of land and buildings in proportion to the ratio of the fair values of their shares in the lease, at the date on which the assets are recognized initially.

Assets acquired under finance leases are depreciated in accordance with IAS 16 "Property, plant and equipment" and IAS 38 "Intangible assets".

The interest element of lease payments represents a constant proportion of the liability outstanding and is recognized in profit or loss for the period of the lease.

All other leases are considered operating leases. Payments made under operating leases are recognized as an expense on a straight-line basis over the life of the agreement. Costs associated with operating leases, e.g. maintenance costs and insurance, are recognized in profit or loss as incurred.

5.8 Tests for impairment of the intangible assets, property, plant and equipment

In calculating the impairment the Company defines the smallest distinctive group of assets for which independent cash flows can be determined – a unit generating cash flows. As a result, some of the assets need to be tested for impairment on an individual basis and others on a unit basis, generating cash flows.

All the assets and units, generating cash flows, are tested for impairment when events or a change in the circumstances indicate that their book value cannot be reintegrated.

When the realizable value of a certain asset or a unit, generating cash flows, is lower than the respective book value, the latter is reduced to the amount of the asset's realizable value. This reduction is an impairment loss. In order to determine the realizable value the Company's management calculates the expected future cash flows for each unit, generating cash flows, and determines a suitable discount factor to calculate the present value of these cash flows. The data, used to make tests for impairment is directly related to the last approved forecast budget of the Company, which is corrected if necessary in order to exclude the influence of future reorganizations and substantial improvements of the assets. The discount factors are determined separately for any distinct unit, generating cash flows, and reflect the risk profile estimated by the Company's management.

The impairment losses per unit, generating cash flows, are distributed in reduction of the book value of the assets from this unit proportionately to their book value. The Company's management subsequently estimates if indications exist showing that the impairment loss recorded in previous years is reduced or does not exist anymore. An impairment loss recorded in a previous period shall be reintegrated if the realizable value of the unit, generating cash flows, is more than its book value.

5.9 Investment property

The Company reports as investment property buildings that are held rather to generate rental income or to increase the company's equity or for both and also for sale within the ordinary economic activity.

Investment property is recognized as an asset in the financial statements of the Company only if the following two requirements are met:

- it is likely to be obtained future economic benefits from the investment property;
- the value of the investment property could be estimated reliably.

The investment property is valued initially at cost that includes the purchase price and any others expenditures which are directly related to the investment property – such as legal fees, transfer property’s taxes and other expenditures for the deal.

After their initial recognition the investment properties are reported in compliance to **the model of the fair value**. The fair value is the most probable price which could be obtained on the market as of the date of compounding the Report for Financial Condition. The investment properties are revaluated on an annual basis and they are included in the Income Statement with their market values. The revaluations are made by independent appraisers with professional qualification and serious work experience and they also have to have recent experience in the location and the category of the qualified property. The qualifications have to be based on pieces of evidence for the market conditions.

The gain or loss arising from changes in the fair value of the investment property is included in the profit or loss in the period in which it arises.

The subsequent expenditures related to the investment property, which have already been recognized in the financial statements of the Company, are added to the book value of the property when it is probably for the Company to obtain future economic benefits that are higher than the initially estimated value of the existing investment property. All other subsequent expenditures are recognized for expenditure in the period when they are incurred.

The Company writes off its investment property when it is sold or when it is permanently taken out of usage, in case that no economic benefits are expected from its sale. Profits and losses from decommissioning or sale of investment properties are included in the Income Statement and are calculated as the difference between the net proceeds from the sale and the book value of the asset.

The rental income and the operating expenditures, related to the investment property, are accounted accordingly as “sales”, “cost of materials”, “cost of services” and “other expenditures”. As a rule the profit from investment property (renting) is an investment profit and is stated separately.

5.10 Financial Assets

The financial assets, excluding the hedging instruments, include the following categories of financial instruments:

- Loans and receivables;
- Financial assets, reported at fair value in the profit or loss
- Investments held to maturity;
- Financial assets available for sale.

Financial assets are distributed towards the different categories depending on the reason why they were acquired. The category of a financial instrument determines the methods used for its valuation and whether the revenues and expenses are reported in the Comprehensive Income Statement or directly to the equity of the Company.

When first recognizing a financial asset, the Company values it at fair value. The transaction costs which could be allocated directly to the purchase or the issuance of a financial asset are allocated

to the value of the financial asset or liability except the financial assets and liabilities reported at fair value in the profit or loss.

A write-off of a financial asset is affected when the Company loses control over the contractual rights that represent the financial asset – i.e. when the rights to receive cash flows have lapsed or a significant portion of the risks and rewards from owning the assets has been transferred. Tests for the depreciation are carried out at each balance sheet date, in order to determine whether objective evidence about the depreciation of specific financial assets or groups of assets does exist.

The interest payments and other cash flows related to the ownership of financial instruments are recognized in the Income statement when they are received, regardless of how the balance sheet value of the financial asset they are related to is determined.

Loans and receivables are non-derivative financial instruments with fixed payments that are not traded on an active market. The subsequent valuation of loans and receivables is made based on the amortized value using the effective interest rate method.

Significant receivables are tested for any impairment separately, when they are passed due as of the balance sheet date or when objective evidence exists that the counterparty would not honor its obligations. All other assets are tested for impairment in groups, determined based on the industry and the region of the counterparty as well as based on other credit risks if applicable. In this case the percentage of depreciation is determined based on historical data on defaults of counterparties in each group identified.

5.11 Inventories, work in progress

The Company operates only by contracting various activities to different contractors; i.e. the Company does not have its own staff and contracts all activities to outside firms. The direct cost of the work in progress includes the expenditures for design, construction-assembly works, advertisement, construction supervision, fees and etc. The cost of the finished goods includes also the loan expenses incurred for the construction of a particular project. (amended IFRS 23, applicable from 01.01.2009).

In the cost of the finished goods (real estate – apartments, commercial properties and etc.) is included as an element and a portion of the value of the land that corresponds to its impairment due to limited rights of disposal. The land shall be valued (according to the Bulgarian legal framework too) by independent licensed appraiser at least once annually.

The direct expenditures are accumulated in the moment of their incurrence by batches for the particular projects, and the indirect expenditures are distributed proportionally to the direct expenditures incurred for the project.

The inventories include materials and finished goods. In the cost of inventories are included the purchase cost and other directly attributable costs related to the delivery. The financial expenses on used loan financing are included in the value of the inventories (work-in-progress) as their attachment to the particular project is analytically taken into account. After the final completion of the construction works the financial expenses are reported directly in the financial result. In case of suspension of the construction works the reporting of the loan expenses, fees and commissions on the used loan financing to the work-in-progress shall be ceased.

The Company determines the expenses for inventories by using the weighted average method.

In case of a sale of inventories, their book value is recognized as an expense for the period in which the respective revenue has been recognized.

5.12 Income taxes

The Company's financial result is not subject to taxation with a corporate tax pursuant to Art.175 of the Corporate Income Tax Law.

5.13 Cash and cash equivalents

The Company reports as cash and cash equivalents the money held in cash and in bank accounts.

5.14 Equity and dividend payments

The Company's share equity shows the nominal value of the issued shares.

The undistributed profit includes the current net profit/loss that is included in the Income Statement and cumulated profits and loss not covered from previous years.

In compliance with Art.10 of the ADSIC Law the Company should distribute as dividends at least 90% from its current annual profit which is determined in the way stated bellow and in consequence of the requirements of Art.247a of the Trade Law. The profit for distribution is the financial result (accounting profit/ loss) corrected as follows:

1. increased/ decreased with the losses/ gains from subsequent asset valuations;
2. increased/ decreased with the losses/ gains from transactions transferring ownership of real estate;
3. increased/ decreased in the year of ownership transfer of assets with the positive/ negative difference between:
 - a) the asset selling price; and
 - b) the sum of asset historical price and subsequent expenses brought about the increase in its book value.

The Company could issue only dematerialized shares which are registered in accounts in the Central Depository. The Company's shares could be written down only for cash payments and their whole issued value should be paid, except in the cases of transforming from shares into bonds, issued as convertible. The ordinary shares are classified as shareholders' equity.

The inherent for issuing new shares or options additional expenditures are included in the shareholders' equity as decrease of proceeds on net taxes. The directly connected with issuing of new shares additional expenditures are included in the price of the acquisition as a part of the payment when purchasing.

The Company could not issue shares which give a right of more than one vote or additional liquidation quota.

The Company could issue different classes of shares. The shares from the same class give equal rights to the shareholders.

The Company could issue the following classes of shares:

- class A – ordinary registered shares with a right of vote and

class B – preference shares with a right of guaranteed or additional dividend and without a right of vote.

The Difference between the nominal value of issued shares and the issue value is included in the additional reserves and it is an element of shareholders` equity of the Company.

5.15 Pension and other liabilities to the personnel

The short-term liabilities to the personnel include wages, salaries and social contributions.

The Company has not elaborated and does not apply any plans for remuneration of employees after they leave or other long-term remunerations and plans for remuneration of employees after they leave, or in the form of compensations with stocks or shares of the equity, since by law the Company may appoint under a contract of employment only one person - Director of Investor Relations.

5.16 Financial liabilities

The financial liabilities include bank loans, commercial and other liabilities as well as financial lease payables.

The financial liabilities shall be recognized when there is a contracted obligation to pay a certain money amount or other financial assets to another company or contract liability of exchange of financial instruments with another company in case of unsuitable conditions. All the expenses related to interest payments are recognized as financial expenses in the Income Statement.

The bank loans are reported in the Company`s Balance Sheet, net from the expenses associated with receiving the credit. Financial expenses such as premium payable when settling the debt or its buy-back, and directly attributable to the transaction expenses are reported in the Income Statement in accordance with the recording principle and the effective interest rate method, and are added to the carrying value of the financial liability to the extent to which they have not been settled as of the end of the period in which they have occurred.

Commercial payables shall be initially recognized at nominal value and consequently valued at their amortizing value less any payments associated with settling the liability.

The dividends that should be paid to the shareholders of the Company are recognized when the dividends are approved on a meeting of the shareholders.

5.17 Provisions, conditional assets and conditional liabilities

Provisions are recognized when there is likelihood that present liabilities, as a result of past events, bring about an outflow of resources of the Company and the amount of the liability could be measured reliably. It is possible that the duration or the amount of cash outflow is not reliable. The current liability rises from the presence of a legal or constructive obligation in consequence of past events. Provisions for restructuring are recognized if a detailed restructuring plan is elaborated and applied or if the management has announced the main points of the restructuring plan to the affected persons. Provisions for future losses from the activity are not recognized.

The amount recognized as a provision is computed based on the most reliable estimation of expenses necessary to settle the current liability by the end of the reporting period provided that the risk and uncertainty are taken into account, including those related to the current liability. The

provisions are discounted when the effect of the time differences in the value of money is substantial.

Compensations by third parties in relation to a given liability of the Company are recognized as a different asset. This asset, however, could not be more than the amount of the respective provision.

The provisions are revised by any Balance Sheet date and their amount is corrected so that it reflects the best approximate estimate by the Balance Sheet date. In the cases in which it is assumed that a resource outflow as a result of a current liability is not likely to occur, such a liability is not recognized. The Company does not recognize any conditional assets since recognizing them may result in recognizing an income which may never be realized.

5.18 Significant estimations of the management when applying the accounting policy

The significant estimations of the Management when applying the accounting policies of the Company, which have the most essential influence on the financial statements, are described below. The main sources of uncertainty when using the approximate accounting estimates are described in point 5.19.

5.19 Uncertainty of the approximate accounting estimates

For preparing the financial report the management makes a number of suppositions, estimations, and assumptions associated with the recognition and valuation of assets, liabilities, revenues and expenses.

The actual results may differ from the suppositions, estimations, and assumptions made by the management and very rarely correspond to the results estimated in advance.

Information about the existing suppositions, estimations, and assumptions which have the most essential influence on the recognition and valuation of assets, liabilities, revenues and expenses is presented below.

5.19.1 Impairment

As impairment loss is recognized the amount by which the book value of a given asset or a unit generating cash flows exceeds its realizable value. In order to determine the realizable value the Company's management calculates the expected future cash flows for each unit generating cash flows and determines the suitable discount factor to compute the net present value of these cash flows. To calculate the expected future cash flows the management makes suppositions on the future gross income. These assumptions are associated to future events and circumstances. The actual results may vary and impose substantial corrections in the Company's assets for the next reporting year.

In most cases determining the applicable discount factor includes performing suitable corrections due to market risk and risk factors which are specific for the different assets.

5.19.2 Useful life of the amortizing assets

The management revises the useful life of the amortizing assets at the end of each reporting period. By 31st December, the management determines the useful life of assets, which is the expected duration of using the Company's assets. The book values of the assets are analyzed in

point 6. The actual useful life may be different from the estimated one due to technical and moral warning out of mainly software products and computer equipment.

6 Property, plant and equipment (Tangible assets)

After their initial recognition the investment property is reported using the reasonable value method. In compliance with the Law on the special purpose vehicles the Board of Directors has assigned the implementation of evaluation of all the properties owned by the Company as of 31.12.2015 to the independent appraiser Dobi 02 OOD. The results of the evaluation shall be reported in the final annual financial statement of the Company.

The book value of the property, plant and equipment could be presented as follows:

	Land	Machinery	Computer and other equipment	Work in progress	Total

The revaluation of the land owned by the Company on 31.12.2015 is negative and amounts to BGN 43 thousand.

7 Investment property

The properties that are built and for which the Company has received Certificate for exploitation and that are not sold and respectively transferred to clients are reported in the item “Investment property”, because the Company is restricted to operate the constructed assets by itself and it could realize income through assigning the management of those assets to third parties. The investment properties are valued initially at their direct cost which includes all the expenditures that are directly related to the particular investment property – such as construction-assembly works, project services, legal fees and other expenditures. After their initial recognition the investment properties are reported through the use of the model of the fair value.

Pursuant to the Special Purpose Vehicles Act the Board of Directors has assigned the completion of revaluation as of 31.12.2015 of all the company’s real estate properties to the independent appraiser – “Dobi 02” Ltd., the result of which was reported in the financial statement of the Company.

The next table presents the changes in the value of the investment property in 2015 and 2014.

	31.12.2015 ‘000 BGN

Net profit from changes in fair value	(98)
Book value as of December 31, 2014	36 143

The Company has invested in the construction of two projects - "Marina Cape" and "Borovets Grand". The projects are described in detail further below.

The construction of the project "Marina Cape" was entirely completed in 2010 and more particularly Zone 4 in the project was finished for which the Company received Certificate of commissioning in August 2010. In addition, the completion works and the final equipment of all the rest properties in the project which up to then were reported as work-in-progress were finished. As a result with Resolution of the Board of Directors from 01.10.2010 all non-sold properties in the complex "Marina Cape" were recognized as investment property.

The amount of BGN 1 056 thousand is reflected as a work in progress, which represents the sum of the accrued expenses on sales of properties in the resort complex "Marina Cape", which will be recognized as an expense in the recognition of revenue in sale with a deed or transferred right of use, subject to the principle of comparability of income and expense (BGN 795 thousand) and BGN 261 thousand representing the value of the purchased equipment for restaurants on the site.

There are two projects that have been built on land plots, owned by the Company. The projects are described in detail below:

Marina Cape Project

"Marina Cape" holiday complex is located in the peninsula part of the Black sea town of Aheloy which allows for picturesque views of both the bay and the open sea. That is reflected both in the urban decision – plastic S-shape of the first and second zone, and in the modeling of the individual residences. An important emphasis of the overall silhouette is the lighthouse and the clock tower.

The complex consists of four distinct zones deployed on a property with area of 40 000 m² and forming a total gross floor area over 66 000 m², with a total of 761 apartments. The complex has 4 restaurants, 4 cafes, 14 spaces for shops, 2 squash rooms (licensed by the Squash Federation), a room for medical and dental center, fully equipped and working fitness, spa center, bowling, children`s center, a room set aside for a bank office, administrative part, offices, 2 swimming pools, and servicing rooms to the relevant objects.

Each zone consists of separate sectors (total 27) and the majority are residential, except the sectors which are intended for: bank office, sport playground area, children`s center and Sector 27 – a restaurant on two levels. As part of the housing sectors are included public buildings – restaurants, cafes, shops, offices, rooms for medical center, fitness. In the central part of the complex there is a swimming pool with a total area of 910 m² with a pool bar and a children`s swimming pool, and in the north-east side is located a pool on area of 470 m².

There is a special project to plant surrounding area of the holiday complex. The ground floor residences of much of the buildings have small separate yards.

The total area of the trade and public objects in the complex is nearly 12 000 m². For the purposes of the complex is constructed and put into operation a new incoming water supply, sewerage and electricity grid. It is done rehabilitation of the existing roads and streets in the region. It is also done and an entirely new road link. There are the appreciate systems to provide telephone signal and internet, including a network for wireless internet and also systems for fire-alarm and video surveillance.

Borovets Grand Project

The project envisages construction of residential properties mainly for holiday use in detached complex of buildings. The complex carries the trade name “Borovets Grand”. It is located in the area of Borovets Resort. Borovets is located on 62 km southeast of Sofia. Borovets is one of the oldest and well-known winter resorts in Bulgaria. Today Borovets is the biggest Bulgarian ski center by length and capacity of the ski slopes and facilities. The climate is mild and in the winter is soft and with much snowfall. The average temperature in January that is the coldest month, is about 4,8° C. Usually the ski season is from the middle of December to April. The resort proposes excellent conditions for winter sports: Alpine skiing, snowboarding, ski-running. The slopes are marked and supported and their total length is 58 km and the longest slope is 12 km. In the complex there are 12 ski-lifts with total length over 14 km. The ski-lifts provide access to the surrounded peaks – Musala, Small Musala, Irechek, Deno, Aleko.

Borovets Grand Complex

The project is for “L”-shaped building situated in the southeastern side of the parcel. There is an egress on two streets. The first two levels are half-dug because of the big displacement. Above these two levels there are three residential floors and on the attic floor there are maisonettes. The Borovets Hotel Complex is located in the old center in the Borovets Resort. On the same place has functioned a summer cinema in the past. The property has been a part of forest, in its northwestern side there is a dense forest, and southwest there is a small river.

The trade-administrative zone and the servicing objects are located in the complex ground floor and basement. They include lounge with a reception and administration, lobby bar, restaurant for 110 places with banquet room and covered terrace, two shops, ski-cloakroom, fitness and spa center, indoor pool, children`s center, bowling, hairdresser`s, lounge with registry. Also there are technical and official rooms and water closets, including and for people with disabilities. The total area of the retails is 3 140 m². The complex has a covered parking on two levels with 34 places and open with 16 places as well.

The residential part of the complex consists of 75 residences with total gross floor area of 5 175 m². They are 41 studios, 14 apartments mainly with one bedroom, and a big variety of maisonettes.

In the surrounding area will be realized a project to plant, with alleys and part lighting and the pine forest will be preserved.

Real estate owned by “Intercapital Property Development” ADSIC given as collateral for credits received by the Company:

1. Towards “Piraeus Bank Bulgaria” AD

1.1. Contract for an investment credit № 1236/2007, concluded on 19.10.2007 for the amount of 4 500 000 (four million and five hundred thousand) EUR to finance the construction of a complex of residential buildings for a seasonal use “Marina Cape”, Aheloy Town, Pomorie Municipality, Bourgas Province.

10 Leases

10.1 Finance leases as a lessee

The Company has acquired under finance leases land and buildings under construction. The net book value of assets acquired under finance leases amounted to BGN 9 953 thousand. The assets are included in the groups "Land" and "Assets under construction" from "Property, Plant and Equipment" (see note 6).

The Company has signed two contracts for financial leasing with "Bulgaria Leasing" EAD dated 17 December 2013 and with "VEI Project" AD dated 30 December 2011. Finance lease liabilities are secured by the respective assets acquired under finance leases.

On 17 December 2013 the Company has concluded a contract with Bulgaria Leasing EAD for financial leasing of real estate subject to which is the investment project “Grand Borovets”, property of Intercapital Property Development ADSIC. The lease price of the contract was EUR 2 927 724.36, excl. VAT. Initially, the lease price was to be paid within a 2-year period for the lease payments or 24 monthly lease installments, with grace period of 6 months and annual interest of 9%. By mutual agreement between the parties in 2014, the repayment of lease payments was extended to 20.12.2019, as a result of which the leasing price was changed to EUR 3 183 968.45 excluding VAT. Under this contract of December 17, 2013 ICPD has transferred by notary ownership of land with ID 65231.918.189 located in Samokov, Sofia region, and built in the property building representing hotel apartment complex service sites with ID 65231.918.189.2, the lessor "Bulgarian Leasing" EAD. As a result, and under the conditions of a leaseback agreement ICPD has received by the lessor possession of the properties subject to finance lease contracts.

Leases include fixed lease payments and a purchase option at the end of the last year of the lease term. Leases are irrevocable, but do not contain other restrictions.

The Company has signed two contracts for operating leases for rental of office space in Sofia with IP Intercapital markets AD and an individual. Operating lease agreements of the Company contain no provisions for contingent rent. None of the operating lease agreements contains an option to renew or purchase escalation clauses or restrictions regarding dividends, further leasing or additional debt.

11 Work in progress

Information about the work in progress by projects is presented in the following table:

Work in progress	31.12.2015 '000 BGN	31.12.2014 '000 BGN
“Marina Cape” project*	1 056	1 062
Total:	1 056	1 062

As of 31.12.2015 the Company accounts BGN 1 056 thousand as “work-in-progress”. The Company accounts as “work-in-progress” only the project Marina Cape. Due to the completion of the construction works in Zone 4 in the vacation complex “Marina Cape” and the conclusion of the completion works on all the rest properties in the project, as of 31.12.2015 there are no properties in “Marina Cape” that are reported in the item “work-in-progress”. The reported value of BGN 1 056 thousands represents expenses for property sales – brokerage commissions and advertising expenses for the real estate properties in the “Marina Cape” project amounting to BGN 795 thousand, which shall be recognized as expenditures in the moment of the income recognition (the final transfer of the ownership on the properties or the establishment of the right to use over them), and BGN 261 thousand, which are reported as work in progress, representing equipment bought for the restaurants on site.

12 Trade receivables – advance payments to suppliers, receivables from customers

The more significant receivables from customers are reported in the following table, incl. receivables from related parties:

Receivables from customers	31.12.2015	31.12.2014
	'000 BGN	'000 BGN
Local and foreign individuals	94	94
Vila OOD	10	9
Bulgarian Bo EOOD	8	8
R S Company EOOD	0	4
Grand Borovetz 2013 EOOD	4 096	4 096
BG Invest Properties AD	567	
Other	300	-
Impairment	(211)	(211)
Total	4 864	4 000

The customers' receivables represent non-paid amounts on contracts for transfer of real estate properties in the vacation complex "Marina Cape" which are due to "Intercapital Property Development" ADSIC. The book value of the trade receivables is assumed for reasonable approximate estimate of their fair value.

All trade receivables of the Company are revised for impairment indications. The Company does not have expectations that the due customers payments will not be paid pursuant to the advanced concluded contracts.

All commercial receivables are exposed to a credit risk. The Company's management does not identify a specific credit risk as much as the trade receivables consist of many different clients.

13 Advances granted

Supplier receivables are presented in the following table:

Supplier receivables	31.12.2015	31.12.2014
	BGN '000	BGN '000
Ventenergy OOD	175	175
Impairment of advance granted to Ventenergy OOD	(44)	(44)
Trace Bourgas EOOD	170	170
Impairment of advance granted to Trace Bourgas EOOD	(170)	(170)
Buildimex OOD	61	61
Impairment of advance granted to Buildimex OOD	(61)	(61)
Technos OOD	47	47
Others	85	81
Impairment of others	(45)	(45)
Total	218	214

Supplier's receivables represent advances paid for the performance of activities related to the landscaping of the Borovets Grand Complex. The receivable from Trace Bourgas EOOD is related to the road connection built at the Marina Cape Complex; the Board of Directors has initiated talks with the Pomorie municipality about the transfer of the said road connection to them.

14 Other receivables

	31.12.2015	31.12.2014
	'000 BGN	'000 BGN
Non-current:		
Deferred expenses under a leaseback	1 339	1 785
Non-current other receivables	1 339	1 785
Current:		
Deferred expenses under a leaseback	450	446
Prepaid expenses	-	-
Others	190	262
Current other receivables	640	708

The deferred expenses during the reporting period have been formed in connection with the leaseback agreement signed by the Company on 17.12.2013. The result from the sale of lease back agreement is a financial lease. In accordance with Art. 20 of IAS 17 "Leases" at the beginning of the lease term of a finance lease the Company recognizes the object of the lease as an asset and a liability in the statement of financial position by an amount equal to the fair value of the leased property at the beginning of the lease term or if lower - the present value of the minimum lease payments, each determined at the beginning of the lease. Initial direct costs incurred by the Company - Fees for research, initial fee, etc. added to the amount recognized as an asset. The result of the sale and leaseback is a finance lease. Therefore from transactions financial result is not definitive. It is not recognized for the period of the transaction in the profits or losses of the two parties to this transaction, in order to meet the requirement of true and fair view.

The difference between the sale proceeds and the carrying value of the asset sold is negative (i.e. the carrying amount is greater in size than the achieved selling price and the proceeds received from the sale), resulting in a realized loss. It should be recognized not once and instantly – at the date of the transaction but to be deferred and amortized over the entire period or period of the lease. In the contract for leasing ICPD realized a loss - the difference between the carrying amount of the asset and the leasing price – in the amount of BGN 4 274 thousand. This cost under IAS 17 is not final but should be rescheduled for the duration of the lease.

15 Money

The money of the Company is kept in depository bank – UniCredit Bulbank AD, St. Nedelya Branch. Most of it is in Euro because of the sales` specificity and the clients` structure.

The money includes the following components:

	31.12.2015	31.12.2014
	'000 BGN	'000 BGN
Money in cash and in bank accounts:		
• BGN	22	36
• EUR	40	21

Total	<u>62</u>	<u>57</u>
-------	-----------	-----------

16 Shareholder's equity

16.1 Share capital

The Company's registered capital consists of 6 011 476 ordinary shares with a nominal value of 1 BGN per share. All the shares are with a right of dividend and liquidation quota and each of them gives a right of one vote in the General shareholders' meetings of the Company.

	<u>31.12.2015</u>	<u>31.12.2014</u>

16.2 Revaluation reserve of assets

According to the theory of business valuation, in the most general the indications for a fair value of a given property could be calculated using three approaches: market approach, income approach and expenditure approach.

By using the expenditure and market approach the objects are treated as they are in the moment of the valuation. When using the income approach in the valuation of the objects are added also the perspective of their growth – their yield.

In accordance with the objective of the valuations as the most approximate approach of calculating the market value is adopted the market approach. In that case the price of the property is formed on the base of research of realized deals on the market with comparable real estate. The market approach looks for the supposed market price of properties that are similar in quality to the valuated one.

When calculating the market value of the property is used information about three properties similar to the valuated one. These properties have to in the same location and also it is need to there are realized deals with them in the last six months during the previous year. The sale prices of the three properties are adjusted with an area coefficient that removes differences between them.

In the calculating of the evaluation is used the following:

- Information obtained by the inspection of the object;
- Information and documents about the legal status of the object;
- Newsletters, price lists and reference books of official editions of Ministry of the Regional Development and Public Works, Bulgarian Construction Chamber and etc;
- Information from appraiser's personal experience.

With Resolution of the Board of Directors the revaluation of the company's assets is assigned to the independent appraisers – "Dobi 02" Ltd., the result of which is reported in the annual financial statements of the Company.

17 Liabilities to financial institutions and liabilities on bond issue

Texim Bank AD	BIR in EUR +1.25% annually	20.12.2016	Euro

The Company issued bond loan in 2007 which was secured only by insurance against financial risk issued by Euroins AD. In the memorandum for the placement of the issue it is stated that the funds were to be used mainly for purchase of land property in Sofia. The bond loan was issued on August 14, 2007. The initial term was 3 years. The amount of the issue was 5 million EUR (9 779 thousand BGN). The principal was to be paid at the end of the period, and the interests to be paid semi-annually. The coupon was 9%. The Company's total expenditure was estimated to about 9% annually. The initial maturity date of the issue was August 14, 2010.

On August 6, 2010 a General Meeting of the company's bondholders was held that took the following decisions:

They agreed to restructure the corporate bond issue with ISIN code BG2100019079, by renegotiating the terms of the issue as follows:

1. Extension of the issue by 36 months (from 14.08.2010 to 14.08.2013);
2. Interest on the bond is amended to 9.5% and it is payable every three months;
3. Scheme to repay the bond loan is amended as follows:
 - 3.1. Repayment of the principal:

2010		2011		2012		2013	
Date	Amount (EUR)						

14.08.	500 000	14.02.	125 000	14.02.	125 000	14.02.	125 000

14.08.2013	92	365	9.5%	77 822

4. ICPD shall establish the following collateral for the bond issue:

4.1. Collateral under Art. 100z, par. 1 of the Law on the Public Offering of Securities: from Euroins Insurance AD, covering the risk of default by the issuer for the interest or the principal payments for the new term of the issue;

4.2. Additional collateral: Establishing a second mortgage on 7 835,99 m² of commercial properties in the vacation complex "Marina Cape", Aheloy (described in an annex to the written materials) in favor of the trustee of the bondholders "Investbank" AD within no later than one month after the date of the General meeting of the bondholders.

Prepayment:

The Company has the right to repay early all or part of the outstanding principal on the bonds. Repayment may be made only on interest payment date and after providing one month's notice to the bondholders. The minimum amount that the company could repay early and partially is 250 000 EUR or 5% of the initial amount of issue.

In fulfillment of its obligations regarding the renegotiation of the bond for collateral of the bondholders' receivables in favor of the trustee bank on the bond issue - "Investbank" AD is established second mortgage on 24 (twenty four) independent retail stores with total area of 7 835,99 m² owned by the Company located in the complex "Marina Cape" Aheloy, Pomorie Municipality Bourgas Province. The mortgage contract was concluded under the Deed of

incorporation of contractual mortgage on 01.09.2010, № 158, Vol. IV, reg.№ 3289, case № 732/2010 of a notary Gergana Nedina.

In addition, with regard to the signing of insurance policy with Euroins AD, covering the risk of default by the Company for interest or principal payments for the new date of the issue, and to ensure the receivable of Euroins AD from Intercapital Property Development ADSIC in the amount of 84 000 EUR, representing part of the premium due under the insurance policy of 104 000 EUR, in favor of Euroins AD was established a mortgage on 2 separate objects, with total area of 108.65 m² owned by the Company located in the complex "Marina Cape" Aheloy, Pomorie Municipality Bourgas Province. The mortgage contract was concluded under the Deed of incorporation of contractual mortgage on 09.08.2010, № 81, Vol. IV, registration № 2884, case № 656/2010 of a notary Gergana Nedina.

At the General Meeting held on 6th February 2013 of the bondholders of Intercapital Property Development ADSIC was adopted proposal to restructure the Company's bond loan.

The proposed agenda was as follows:

Item one:

- Giving consent for rescheduling and restructuring of the obligations on emission ISIN code BG2100019079, through renegotiation of some of the conditions as follows:

1. Extension of the term of the issue by 60 months (as from 14 August 2013 until 14 August 2018);
2. The principal repayment schedule is amended as follows:

2.1. Principal (amortisation) payments in euro:

2013 г.		2014 г.		2015 г.		2016 г.		2017 г.		2018 г.	
date	amount (euro)										
14.02.	62 500	14.02.	62 500	14.02.	125 000	14.02.	187 500	14.02.	250 000	14.02.	250 000
14.05.	62 500	14.05.	62 500	14.05.	125 000	14.05.	187 500	14.05.	250 000	14.05.	250 000
14.08.	62 500	14.08.	62 500	14.08.	125 000	14.08.	187 500	14.08.	250 000	14.08.	250 000
14.11.	62 500	14.11.	62 500	14.11.	125 000	14.11.	187 500	14.11.	250 000	-	-

2.2. Interest (coupon) payments within the extended term:

- The interest rate following 14 Feb 2013 until the maturity date shall be decreased to 7.25% per annum, payable at 3-month period on the dates as per the Table enclosed in the invitation;
- The interest payments due following 14 February 2013 until the maturity date shall be calculated by gradual decrease of the interest rate by 0.25%. The exact amount of the interest payments as well as the terms for applying the new gradual decrease of the interest rate are specified in the invitation and in the table enclosed;

2.3. The Issuer shall be still entitled to make a total or partial early repayment of the outstanding principal of the debenture loan. That repayment might be effected only on a date of an interest

payment. The minimum amount that might be early repaid must equal at least one amortisation payment due for the respective period;

3. All due principal and interest payments under the bond issue shall be effected in Bulgarian leva as per the official rate of exchange of the BNB as of the date of performance of the GMB /EUR 1 = BGN 1.95583/. In case that BNB's central exchange rate is changed, all payments shall be effected in Euro;

4. The Issuer shall be obligated to open a special current account at UniCredit Bulbank AD to service the payments under the debenture loan;

5. Security of the issue: Except for the insurance provided by Insurance Company Euro Ins and the second-tier mortgage, the Issuer shall be obligated to provide new additional collaterals such as: to sign a supplement to the insurance policy provided by Euro Ins and to create a first-tier mortgage on an own real property as described in the invitationn

6. Other terms and ratios:

6.1. Ratio between Equity and Secured Debt: The Company undertakes to maintain a ratio between equity and secured debt, calculated by dividing the balance sheet equity capital of the Company to the sum of all collateralized obligations, not lower than 0.10 (zero point ten) until the full payment of the bonds of this issue.

6.2. Maximum ratio of Liabilities to Assets according to their book value: The Company undertakes to maintain a maximum ratio of the book value of its Liabilities to the book value of its Assets at an amount of not more than 0.95 (zero point ninety five) until the full payment of the bonds of this issue.

Item two:

Adoption of a decision, the GMB to assign and respectively authorise Intercapital Property Development ADSIC to undertake all necessary decisions and actions in pursuance with the voted amendments to the terms and conditions of the bond issue having ISIN code BG2100019079.

In addition, technical corrections in the draft on insurance policies of "Euro Ins" AD were made (which was part of the written materials for the meeting) to better protect the rights of the bondholders of the Company.

At a meeting of the Board of Directors of BSE-Sofia AD under Minutes № 8/11.02.2013, it was decided to change the parameters of the issue of debentures of the Company admitted it to Segment of the BSE-Sofia. The changes were reflected on BSE with effect from 13.02.2013.

According to the decision of the General Assembly on 06.02.2013, on 06.03.2013 in front of Zhiva Barantieva - assistant - notary who replaces Gergana Nedina, notary area of operation - the area of the District Court - Pomorie entered in the register of Notary Chamber under № 607 was signed deed of establishment of a mortgage in favor of Investbank AD, in his capacity as representative of the holders of the above bond, the following property owned by ICPD plot of land with ID 00833.5.409, address: Aheloy, Treatment area with an area 40,002 square meters

With the establishment of a mortgage ICPD fulfill its obligation to provide collateral on outstanding, as of the date of the meeting, bond loan of € 3,500,000 (three million five hundred thousand euro), together with interest due.

On 11/02/2015, there was a General Meeting of Bondholders of corporate bonds with ISIN code BG2100019079, issued by the ICPD. Pursuant to Art. 214 para. 1 of the CA General

Meeting of Bondholders was convened by the representative of the bondholders "InvestBank" AD. At the meeting the following decisions on relevant agenda items were adopted.

On the first point was given for rescheduling and restructuring of the obligations on the issue of corporate bonds with ISIN code BG2100019079, by renegotiating the terms of the issue as follows:

1. Extension of the issue 24 months (from 14.08.2018 years - until 14.08.2020 years);
2. Scheme for repayment of the bond loan and interest shall be amended as follows:
 - 2.1. The principal shall be paid to the following contributions:

2015	2016	2017	2018	2019	2020
Date/amount (euro)					
14.02./ 62 500	14.02./ 62 500	14.02./ 125 000	14.02. /125 000	14.02./ 187 500	14.02./ 250 000
14.05./ 62 500	14.05./ 62 500	14.05./ 125 000	14.05./ 125 000	14.05./ 187 500	14.05./ 250 000
14.08./ 62 500	14.08./ 62 500	14.08./ 125 000	14.08./ 125 000	14.08./ 187 500	14.08./ 250 000
14.11./ 62 500	14.11./ 62 500	14.11./ 125 000	14.11./ 125 000	14.11./ 187 500	

2.2 . Interest payments are due under the following conditions:

- a) The agreed interest rate on the bond loan will be reduced to 6% on an annual basis from 14.02.2015.
- b) The possibility of applying a step for the reduction of the interest rate on the bond loan in the amount of 0.25% (zero point twenty five percent) is retained only on condition that there is prompt payment of interest and principal payments, until the interest rate reaches 5% annually. The principles and interest payments are considered to be paid on time in the event that the total amount payable for the preceding quarter, was ordered to the bank account of the "Central Depository" AD servicing debenture loan payments no later than two working days before the corresponding maturity.
- c) Interest on the debenture loan is payable quarterly on the dates indicated in the table below:

Date of interest payment	Days in interest period	Days	Interest rate	Amount of due interest (EUR)
14.02.2015	92	365	7,00%	52 932
14.05.2015	89	365	6,00%	42 976
14.08.2015	92	365	5,75%	41 668
14.11.2015	92	365	5,50%	38 990
14.02.2016	92	366	5,25%	36 291

14.08.2019	92	365	5,00%	14 178
14.11.2019	92	365	5,00%	11 815
14.02.2020	92	366	5,00%	9 426
14.05.2020	90	366	5,00%	6 148
14.08.2020	92	366	5,00%	3 142

3. If, within three (3) days before the expiration of 30 days from the maturity of any outstanding principle and/or interest payment the issuer fails to submit to the bondholders' trustee the document that the payment is made in a bank account "Central Depository" AD, servicing debenture loan payments, it is considered to be the event of default on the bond issue as "Investbank" AD may exercise their rights of bondholders' trustee, under contract with the Issuer and the relevant laws.

4. The bondholders agree that any payment under the terms of the issue within the period prescribed under p. 3 will be considered for payment under the issue and will not give rise to any adverse effect on the Issuer. Payment to meet the conditions of the previous sentence can be done both by the Issuer and by any third party.

5. All other conditions issued by "Intercapital Property Development " REIT bond issue , except as expressly stated above shall remain in force and retain their effect as originally agreed, respectively renegotiated by the General Meeting of Bondholders.

On the second point changing the conditions of security provided by the issuer pursuant to Art. 100z, par. 1 of the Law on the Public Offering of Securities and representing insurance from "Euroins" AD was adopted covering the risk of default by the Issuer of interest or principal on corporate bonds with ISIN code BG2100019079.

18 Trade payables

The next table represents the most significant obligations of ICPD ADSIC as of 31.12.2015.

These liabilities have arisen in relation to concluded contracts for construction of the “Marina Cape” project – a complex of residential buildings for seasonal usage and for the “Borovets Grand” project. The repayment amounts will be finalized in the end of 2015.

The most significant obligation is to the main constructor “Midia” AD. Except the obligations to the construction company, which represent the greatest part of all liabilities of ICPD, the Company has obligations due to received advance payments from clients to whom the Company shall render ready apartments according to the specific terms agreed.

28 Book value of assets sold

In the item “Book value of sold assets” the Company records the book value of the alienated investment properties, BGN 76 thousand.

The investment property could be written off in case of a sale or in case of an establishment of a right to use in favor of third party. In determining the date of disposal of an investment property, the Company applies the IAS 18 for revenue recognition from sale of goods or uses the Appendix to IAS 18.

Book value of assets sold (incl. Investment property) is BGN 76 thousand (2014: BGN 352 thousand).

29 Financial expenses and financial income

In 2015, the company generated financial income amounting to BGN 1 389 thousand. Revenues are formed under two contracts concluded by the Company for the sale of options to a third party for the purchase of real estate owned by the issuer, namely: real estate located in the town. Samokov resort Borovets as follows: 1) land with ID № 65231.918.189 and 2) built into it building with ID № 65231.918.189.2, representing Serviced apartment complex with service facilities.

As a result, Intercapital Property Development REIT reports revenue options that are reflected as financial income.

The financial expenses for the presented periods include the following elements:

	31.12.2015	31.12.2014
	'000 BGN	'000 BGN
Income from gains from transactions with financial assets and instr.	-	2 796
Other proceeds	1 389	543
Interest expenses	(1 980)	(1 766)
Losses from foreign exchange operations	-	(1)
Other financial expenses (fees on renegotiation of bank loans and forfeits)	(3)	(6)
Total financial expenses/income	(594)	1 566

30 Changes in the fair value of investment properties

The negative change in the valuation of the investment properties in 2015 amounts to BGN 97 thousand.

31 Tax expenses

The Company's financial result is not subject to taxation with a corporate tax in compliance with Art.175 of the Corporate Income Tax Law.

32 Per share Profit/Loss

The basic and diluted profit / loss per share are calculated using the net profit / loss subject to distribution among Company shareholders.

The weighted average number of shares used for the calculation of the base profit / loss per shares as well as the net profit / loss that is subject to distribution between the holders of ordinary shares, are presented as follows:

31.12.2015	31.12.2014
BGN	BGN

Profit / (Loss) for distribution (in BGN '000)	0	(1 599)
Weighted average number of shares (in '000)	6 011	6 011
Basic profit / (loss) per share (in BGN)	0.03	(0.27)

For the purpose of dividend distribution the financial results are converted in accordance with Section 5.14 of the accounting policies.

33 Transactions with related parties

The Company's related parties are the Company's shareholders, the key management personnel and other related parties which are described below.

Unless otherwise stated, the transactions with related parties are carried out under no special conditions. They have neither received nor have given any guarantees.

33.1 Transactions with subsidiaries:

	31.12.2015	31.12.2014
	'000	'000
	BGN	BGN
Sale of goods and services		
- sale of services to "Marina Cape Management" EOOD	402	478
Purchase of goods and services		
- purchase of services from "Marina Cape Management" EOOD	392	672

33.2 Related party balances at year end:

	BGN	BGN
Current:		
Marina Cape Management EOOD	2 471	2 010
Total current liabilities to subsidiaries	2 471	2 010

35 Risk management policy and objectives

The company regularly analyzes the liquidity of assets and liabilities.

(a) *Market risk*

(-) Currency risk. The expenses of the Company are denominated in BGN or in EUR. In BGN denominated expenses are associated with the construction and operation of real estate. The cost

of the real estate most often is negotiated in BGN. On the other hand, almost all other earnings are negotiated in EUR. In a currency board and fixed exchange rate of the lev against the euro, currency risk for the company is virtually none.

The Company is exposed to a currency risk in the transactions with financial assets denominated in a foreign currency.

In conducting of transactions in foreign currency there are currency gains and expenses which are included in the Income Statement. During the reporting period the Company has not been exposed to currency risk, in so far as no positions have occurred in currencies other than the lev and euro.

The policy on currency risk management applied by the company is not to have substantial operations and do not maintain open positions in foreign currencies other than Euro.

(-) Price risk. The risk of increase in inflation is associated with reduction of real purchasing power of economic actors and the possible impairment of assets denominated in local currency. The currency board controls money supply, but external factors (e.g. rising oil prices) could put a pressure on upward price levels. After accession to the EU there is pressure on the convergence of price levels to those of other EU countries, i.e. inflation in the country is higher than the average rate of inflation in the Member States of the EU. Although the rate of inflation in the country slowed as a result of the recent global economic and financial crisis, it remains higher than the average inflation rate in the EU. At present and in general the mechanism of the currency board provides assurance that inflation will remain under control and there will be no adverse impact on the economy, and particularly on the Company.

The Company may be exposed to risks of rising prices of some individual commodities, materials and services related to the activity and the risk of lowering the price of owned properties.

- Risk of rising price of land property. Parcels of landed properties are a major "staples" used in the Company for the construction of real estate. Significant increases in land prices could reduce the profits of the Company and opportunities to pursue business. The possibility of loss is eliminated from the policy of the Company, under which property is sold (in advance) only after the landed property or the right to build on it be purchased or agreed (in the case of the provision of compensation).
- Risk of lower real estate prices. Evolution of market prices of real estate and specifically the assets owned by the Company changes their net value and net asset value per share. The reduction in market prices of real estate and the income from them would reduce revenues, respectively would reduce the Company's financial results, of which 90% is distributed as a dividend.

The financial crisis in Bulgaria led to a sharp decrease in the economic activity, a drop in foreign investments, an increase in the unemployment rate and a credit crunch. This has a strong negative effect on the real estate sector leading to a sharp drop in demand, price levels and activity. A large number of developers and construction companies were faced with the challenge of trying not to cease their activities or fall into bankruptcy, which had a negative effect on the employment in the sector.

Although municipalities that rely on the buyers of vacation properties continue to experience problems, last year was quite successful for the market, even Varna and Burgas managed to catch up after the delays due to the withdrawal of Russian buyers. The growth, of the two major Black Sea markets, however, is entirely due to the growth of transactions in the cities of Varna and Burgas and increased activity in the market of urban real estate. 230 300 transactions for real estate were concluded in 2015, an increase of 5.6 percent compared to 2014. The activity in the mortgage market in 2015 was even more pronounced. This is promising for the housing market. The number of mortgages last year reached 49 700, an increase of 32% compared to 2014. Deals

in Sofia for 2015 increased by 16.6% compared to 2014 to nearly 24 400. Mortgages in the capital are nearly 11,500 last year, an increase of 33% compared to 2014

The Company is exposed to a risk of lower real estate prices from the time it incurs any expenses related to their construction to the moment of their sale. The Company aims to mitigate that risk by incurring construction expenses (including purchase of land plots) only when there is actual market demand for the specific properties to be built and offered for sale.

- Risk of changes in other prices related to the construction. Most of the prices of materials and services related to construction are changing in the same direction with the change in prices of “output products” - real estate. This is because on them the greatest impact is demand from contractors in the local market. One major exception to this rule is the price of steel. It is affected much more by world prices rather than local factors. Because of that reason, a situation could arise in which steel prices are rising while output prices are not changed or decreased. Bulgarian economy in recent years shows an increasingly strong correlation with the EU economies. In particular, the global financial and economic crisis affects almost equally and simultaneously (with a difference of several months) the global property markets and the market in Bulgaria. We expect prices of construction materials and services to run in parallel with the percentage movement of property prices.

(-) Risks associated with increased competition. Following the significant growth of the Bulgarian property market in recent years before the global financial crisis, in the sector have entered many new players, including many foreign investors. As a result, we have witnessed increasing competition among construction companies, real estate companies with special investment purpose, commercial banks, individuals and others. This reflects the investment costs of the Company and may reduce the attractiveness of investments in securities of Intercapital Property Development ADSIC.

As a result of the current global financial situation, development of the real estate market has made a significant change that began during the last months of 2008.

During 2009, and up to the middle of 2010 this trend has strengthened because of continuing restrictions on funding for both sides - investors and buyers. A significant number of projects dropped due to financial crisis, most of them in the capital. The global slowdown in the real estate sector carried over its negative impact on Bulgaria. One trend is the withdrawal of higher risk foreign investors from the Bulgarian market and the introduction of more conservative German and Austrian companies and funds.

In the current conditions of timid and slow recovery from the economic crisis and of increased competition, the Company is looking to find still undervalued sectors or market niches where it could achieve a profitability that is higher than the sector average. In addition the Company is adding other value added services to its clients including the possibility of a delayed payment up to 5 years.

(b) Interest rate risk of cash flow and fair value

The Company may be exposed to interest rate risk if there is a mismatch between the type (fixed or floating income, respectively interest) of assets and liabilities. The main assets of the Company are property (land or those under construction). It could be assumed that these assets are fixed-price or income because their price is not affected directly by changes in interest rates. The Company will seek to finance these assets in debt instruments, which also be fixed rate. Where this is not possible or not favorable to the company, it may use and a floating-rate debt. In these cases the Company will constantly analyze forecasts on interest rates. In case of significant risks

of a large increase in interest rates, which have a significant negative impact on profits of the company, it may use derivatives or other financial instruments to hedge this risk.

As of 24.03.2016 the Euribor interest rates are negative and are represented in the following table:

	03-24-2016
Euribor - 1 week	-0.349%
Euribor - 2 weeks	-0.343%
Euribor - 1 month	-0.331%
Euribor - 2 months	-0.277%
Euribor - 3 months	-0.242%
Euribor - 6 months	-0.134%
Euribor - 9 months	-0.072%
Euribor - 12 months	-0.005%

(c) Credit risk

In its activity the Company may be exposed to credit risk when it pays in advance (grant advances) to its suppliers or has sales claims (including the sale with deferred payment). Company policy provides for the avoidance of advances as far as possible. Yet when these are imposed (e.g. purchase of windows, elevators and etc. for buildings under construction), the Company will analyze in detail and depth the reputation and financial condition of the suppliers and if necessary will require a bank and other guarantees of good performance. Similarly, in the conduct of sales of goods and services and providing loans to customers, the Company will focus on the credit standing of counterparties.

(d) Liquidity risk

Liquidity risk arises in connection with securing funding for the activities of the Company and its management positions. It has two dimensions - risk the Company will not be able to meet its obligations when they fall due and the risk of being unable to realize company assets at an appropriate price and within acceptable limits.

The company aims to maintain a balance between maturity of funding and flexibility of the use of funds with varying maturity structure.

The company aims to reduce the risks of a shortage of cash by taking investments and works only when the financing is secured with its own funds, advances from customers or borrowings. Company monitors closely the financial markets and the opportunities for raising additional funds (own or debt). The company seeks to shorten the time to raise such funds as necessary.

In the current financial crisis when liquidity risk is becoming more relevant to existing businesses, Intercapital Property Development ADSIC seeks to reduce the negative impact thereof, and because of that it has taken the following measures:

- The Company ensures strict observance of their contracts with financial institutions to exclude the possibility to request early repayment;
- Priority work with financial institutions (banks) in good financial health;
- Optimization of costs, review the investment program;
- Actively seeking buyers for the properties offered by the Company to generate cash and maintain adequate cash.

36 Policy and procedures for capital management

The Company's objectives associated with the capital management are as follows:

- to ensure capacity so that the Company can continue to exist in compliance with the going concern principle; and
- to ensure adequate return for the shareholders by determining the price of their products and services in accordance with the level of risk.

The Company manages the capital structure and makes the necessary adjustments in accordance with changes in the economic environment and risk characteristics of the respective assets.

To maintain or adjust the capital structure, the Company may change the amount of the dividends distributed to the shareholders, may return capital to the shareholders, may issue new shares and may sell assets in order to reduce its liabilities.

37 Events after the end of the reporting period

After the annual reporting period the Company was informed of new cases instituted against it, the most important of which are:

- c.l. № 1501/2016, TO, 6-11 composition of Sofia City Court initiated by an action of "PIRAEUS BANK BULGARIA" AD. The claim is for breach of obligations under a contract for an investment loan № 1236/2007 and the annexes to it. It is brought for an amount of 250 000 EUR, part of a common claim in the amount of 3 799 150,91 EUR;
- c.l. № 777/2016, TO, 6-11 composition of Sofia City Court initiated by an action of "PIRAEUS BANK BULGARIA" AD. The claim is for breach of obligations under a contract for an investment loan № 736/2008 and the annexes to it. It is brought as a partial to the amount of EUR 300 000 EUR, part of a common claim in the amount of 3 673 027,05 EUR.

Furthermore, the Company was informed by the Court of Arbitration for commercial disputes - c. Burgas, that it was condemned by arbitration File No. 10/2015 to pay the sum of BGN 525 075 to the plaintiff Midia AD, which includes a principal of 100 thousand, contractual interest, compensation for delay and arbitration fees and expenses.

More information about the status of pending lawsuits, arbitration and enforcement proceedings is set out in Section VI, art. 20 of the Annual Report of the Company.

Next, on 01.02.2016, the Company signed an Annex to the Contract with "VEI Project" AD from 30.12.2011 according to which the parties agree that the period within which ICPD has to pay the "VEI Project" AD the rest of the selling price of the property subject to the Contract, which to 02.01.2016 was in the amount of EUR 841 989.39 incl. VAT to be extended to 30.09.2021, as the the terms of deferred payment changes as follows:

Interest rate: 6.5% per year for the extended term of the contract, which shall apply as from 01.02.2016

- Deadline: 30.09.2021
- Payment of interest: every month to the last day of the month until the expiration of the deferred payment;
- Payment of the remaining of the purchase price: 9 equal monthly installments maturing from January 30, 2021 to September 30, 2021

38 Approval of the financial statements

The financial statements as of 31st December 2015 (including the comparable data) have been approved and adopted by the Board of Directors on 28th March 2016.
